

Declaration of Conformity to the REACH Regulation

Plastechnik AG specialises in the manufacturing of sophisticated plastic injection moulded parts in high volumes, which are ultimately used in a variety of applications. The necessary raw materials (plastic granules) are purchased from suppliers in Switzerland and Europe and are further processed into "products" through the injection moulding process. Our products and processes are therefore not to be defined as substances or preparations. Furthermore, no substance is released from our articles under normal and foreseeable conditions of use. Plastechnik AG is therefore neither subject to the obligation to register nor to prepare safety data sheets.

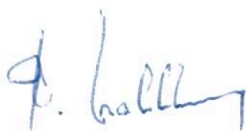

In order to secure the supply chain and in the interest of highest product safety we demand and pursue the implementation of REACH also on the side of our suppliers. The assurance of REACH conformity is part of our supplier approval and is also required by us for every single material order (plastic granules).

Declaration of conformity to the RoHS Directives

Herewith we confirm the conformity of our deliveries and services with the Directives 2011/65/EU and 2015/863/EU (RoHS). The declaration refers to those deliveries and services that are affected by the above-mentioned directives and insofar as no exemptions exist for certain applications.

Bösingen, 20th October 2020
